Mac SMS Transfer is an app developed by Backuptrans. The latest version of Mac SMS Transfer is 12.61 MB built for macOS 10.10 or higher. Wifi Direct support and Wifi Router management for your iPhone. How to manage your Wifi and Wi-Fi network. *** Important note: because of the reorder of status in iOS 11, *this* app was updated. Before iOS 11, it just provided a quick way to reorder the status order, but you needed to manually open the Messages app to see the changes. Now, all of your status icons are set in the order you set them. You can also now reorder contacts in the Notes app, as well as rearrange tags in the Photos app. For other features, visit the web version of this app (for iPhone and iPad) or the iPad version (for iPad). (And when you're done, stop by the home screen tab and delete the unnecessary apps that were installed with this one.)

- All your SMS messages, including the ones that you sent with iMessage
- It can transfer from your iPhone or iPad to your Mac
- Full support for contacts and notes
- More than 100 original Mac icons and themes

The native SMS app in macOS can handle messages and contacts, but can't handle message threads and notes. With this app, you get an all-in-one solution to iPhone to Mac SMS Transfer, Notes to Mac SMS Transfer and Contacts to Mac SMS Transfer. Mac SMS Transfer also provides you with a convenient way to transfer iMessage text and media from your Mac to your iPhone, iPad and iPod Touch.
